

## Notes:

1. Overview of progress
  - a. Almost done with MVP, will submit again on Friday
    - i. One business, users
  - b. Login, user/pass changes
    - i. Sign-up with code to become admin/business user
  - c. Comments
  - d. Check-in
  - e. \*Change project plan (focus on 3 core concepts: broadcast, comments, check-in, improve UI and add business search for finished project)
2. Questions we have
  - a. Feedbacks from MVP Presentation
    - i. Make UI and layout better
      1. Make text on homepage more readable, title and error messages
      2. Make check-ins more readable
      3. Make comments look more like comments rather than chatbox
      4. User's attention is drawn to where is important
    - ii. Concepts
      1. Check-in (Reserve?)
        - a. Prevent overcrowding at times
        - b. Let businesses know when people are checking in and also limit amount of customers (and prepare for people coming)
        - c. Stagger people for when/where on ski slope
        - d. Improve display of information?
          - i. Make prominent number of people at place at time
          - ii. Bar chart of people at a time (business)
      2. Concepts beyond just information
        - a. Unique supporting what we are trying to do
    - iii. UI designs
      1. Maybe? Beautify + Bootstrap Vue
  - b. Ski-oriented?
    - i. See classmate suggestions
  - c. SQL/database
    - i. Keep list of businesses, never changes
    - ii. SQLite loses information if server goes down
    - iii. PostgreSQL instead?
3. Upcoming plan
  - a. MVP: updated scope (project-plan commit), implement important features
  - b. Final product: polish what we have, core features, limit scope, improve usability
  - c. Reassign task (more meetings about this)
    - i. Qiuyue: business + broadcast
    - ii. Kevin: database
